

TYLER DARISME

Bay Area, CA | tylerd2474@gmail.com | linkedin.com/in/tyler-darisme-454011300 | github.com/a-Fig | afig.dev

EDUCATION

San Jose State University | *B.S. Computer Science* San Jose, CA | Expected May 2028
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, Advanced C++, Advanced Python
Clubs: ACM, Competitive Programming Club
De Anza College | *Certificate of Achievement, Programming in C/C++ (With Honors); Dean's List* Cupertino, CA

EXPERIENCE

ACM @ SJSU | *Consulting Project Lead* San Jose, CA | Sep 2026 – Present
• Leading a client consulting engagement through the club, coordinating a small team from requirements through delivery
Competitive Programming Club, De Anza College | *Tech Officer* Cupertino, CA | Sep 2025 – Feb 2026
• Delivered weekly lectures on algorithms and data structures to club members
• Mentored students 1-on-1 to prepare them for the ICPC
Shipcaptain (Startup) | *Software Engineering Intern* Remote | Jun 2025 – Aug 2025
• Built a secure, full-stack admin portal using Next.js 15, TypeScript, Prisma, and PostgreSQL
• Implemented role-based access control, audit logging, and middleware-based route protection
• Integrated NextAuth.js for authentication and password reset workflows with automated email notifications
Serraform Labs (Startup) | *Software Engineering Intern* Remote | Oct 2022 – Jul 2023
• Built the on-chain smart contract handling user payments via the USDC token, as part of a 7-person team shipping a live Web3 product for a multi-billion-dollar crypto project
• Integrated customizable subscription terms, administrative fund oversight, and comprehensive event logging

ACHIEVEMENTS

• **2nd Place**, UC Berkeley AI Hackathon – won sponsor track for best token compression solution with Accordion 2026
• **1st Place**, SJSU Admitted Spartan Programming Contest Apr 2025
• **3rd Place**, DAHacks 3.5 with AceAnything May 2025
• **Top 20 On-site**, ICPC Regional Feb 2024 & Nov 2024

PROJECTS

Accordion | *TypeScript, Tauri, Rust* | 243 GitHub stars get-accordion.dev | [GitHub](https://github.com)
• Open-source context management and visualization tool for developers
• Replaces /compact with reversible per-block folding and swappable strategies that decide when and how to edit context
• Batched context edits to minimize KV-cache invalidations, **cutting inference costs by up to 90%**
• Used the attention from a 500M-parameter model as a proxy to rank the relevance of past context
• Achieved **83.3% task completion vs. 33.3% for naive compaction** on SlopCodeBench under a 100k-token budget
AfterCart | *PostgreSQL, Google Vision API, Cloud Run, Gemini* Live | [GitHub](https://github.com)
• Receipt-to-price-comparison tool: photograph a grocery receipt, get a basket-level comparison across nearby stores
• Ingested **18,649 price observations** across 14,053 unique barcodes and 244 stores via Open Food Facts and live receipts
• Deployed on Cloud Run with PostgreSQL/PostGIS/pgvector; Google Vision OCR and Gemini 2.5 Flash item matching
Automated Game Bot | *Python, Computer Vision, Multithreading* | 25 GitHub stars [GitHub](https://github.com) | [Video](https://www.youtube.com/watch?v=...)
• Built a fully autonomous game bot using 5 custom YOLOv11 object detection models and a multithreaded architecture to drive real-time decisions in a dynamic environment
• A closed-source fork acting as a market maker in a digital market achieved **consistent profitability across \$840K+ in total volume** and tracks 10+ KPIs for visibility
Blockchain Projects | *Solidity, JavaScript*
• Built a Uniswap v3 position manager with concentrated liquidity optimization and secure OpenZeppelin contracts

SKILLS

Languages: Python, TypeScript, JavaScript, C++, Solidity, Rust
Frontend: Next.js 15, Svelte/SvelteKit, Vue, Tauri
Backend: FastAPI, Flask, Prisma, NextAuth.js, Node.js
Databases: PostgreSQL, PostGIS, pgvector, Cloud SQL
Cloud & Infrastructure: Google Cloud Run, Cloudflare Pages/Workers, Durable Objects, Docker
AI / ML: Claude Code, pi, MCP, YOLOv11, Transformers.js, Gemini API
